Caner Ates

iOS Developer

Passionate and highly skilled iOS developer with nine years of experience in software development, including four years in web development and five years in iOS development. Experienced in building a wide range of mobile applications, with a special interest in AR technologies. Skilled in ARKit and RealityKit, creating advanced augmented reality experiences such as LiDAR scanning, real-time 3D rendering, and interactive AR features, while also delivering high-quality solutions across diverse iOS projects. Committed to crafting innovative, immersive, and user-centric applications.
