Caner Ates

iOS Developer

Passionate and highly skilled iOS developer with nine years of experience in software development, including four years of solid background in web development and five years of continuous growth in iOS development. Specialized in ARKit and RealityKit, with hands-on expertise in building advanced augmented reality experiences, including LiDAR scanning, real-time 3D rendering, and interactive AR features. Proficient in end-to-end mobile application development, driven by a commitment to crafting innovative, immersive, and user-centric solutions.
