SUMMARY

Senior iOS Developer with over nine years of software development experience, including more than five years focused on iOS and four years in web development. Skilled in designing, developing, and maintaining production iOS applications with strong expertise in Swift, SwiftUI, and modern iOS architecture. Built and delivered native iOS applications across consumer, utility, enterprise, and augmented reality domains, with a focus on scalability, performance, and user experience.

EXPERIENCE

Senior iOS Developer

ARtesio, Istanbul, Türkiye

Feb 2026 - Present

- Designed and developed an Augmented Reality platform for interactive 3D product visualization.
- Architected and implemented a multi-platform product ecosystem spanning native iOS application, a web administration portal, and cloud backend services
- Built scalable native iOS application using SwiftUI, MVVM-C, Clean Architecture, Swift Concurrency (async/await), ARKit, RealityKit and App Clips
- Developed backend services using Firebase and Cloudflare Workers, implementing QR-driven WebAR and native App Clip experiences for seamless cross-platform AR product visualization

iOS Developer

Seenooks, Istanbul, Türkiye

Nov 2024 - Feb 2026

- Sole iOS developer responsible for the design and development of native iOS AR applications using Swift, MVVM-C, Clean Architecture, Swift Concurrency (async/await), ARKit, and RealityKit
- Built advanced AR features including real-time LiDAR scanning, 3D model generation, and interactive object visualization
- Collaborated closely with product owners and designers to deliver product-ready features
- Delivered and maintained AR Capture and AR Viewer applications for the App Store

iOS Developer

Freelance

May 2023 - Nov 2024

- Delivered end-to-end development of production iOS applications using Swift, SwiftUI, and UIKit, owning architecture, feature development, and App Store releases.
- Developed MobleAR, a real-time AR design application supporting USDZ models, interactive placement, and real-time visualization
- Created PassCraft, a secure password generator focusing on usability, data safety, and platform-specific password generation

iOS Developer

National Taipei University of Technology, Taipei, Taiwan

Sep 2020 - Apr 2023

- Sole iOS developer responsible for end-to-end design and development of a production-ready augmented reality iOS application
- Built Chamber Interior Design, an AR-based interior design app evolving from academic research into a real-world product
- Implemented real-time AR features using ARKit and RealityKit, including 3D room layout generation, interactive object placement, and dynamic texture and lighting updates

Software Engineer

Power Active Co. Ltd., Taipei, Taiwan

Sep 2019 - Sep 2020

- Developed an iOS prototype application for IP camera and NVR device control, integrating a C++ SDK into a Swift-based iOS application
- Designed and developed a multi-language, role-based e-commerce web platform, owning application architecture, backend services, database management, and UI implementation

Software Engineer

Vestel Electronics R&D Corp., Istanbul, Türkiye

Feb 2014 - Aug 2017

- Developed and maintained a multi-language, multi-branded Smart TV web portal deployed across 80+ countries and 50 brands
- Built and maintained web applications and internal management tools supporting the Smart TV platform

SKILLS

iOS Development: Swift, SwiftUI, UIKit, Combine, Swift Concurrency (async/await)

Architecture: MVVM, MVVM-C, Clean Architecture, Dependency Injection

Backend & Data: Firebase, Cloudflare Workers, REST APIs, Core Data

AR & 3D: ARKit, RealityKit, LiDAR Scanning

Tools: Git, SPM, TestFlight, App Store Connect, Instruments, Codex, Claude

Web Development: React, Material UI, Styled Components

EDUCATION

M.Sc., Electrical Engineering and Computer Science

National Taipei University of Technology, Taipei, Taiwan

2017 - 2019

B.E., Telecommunications Engineering

Istanbul Technical University, Istanbul, Türkiye

2008 - 2013

PROJECTS

Higherly: Higher or Lower

A native iOS trivia game featuring category-based gameplay, adaptive difficulty, and competitive leaderboards

Website: <https://higherly.canerates.com>

PassCraft: Password Generator

Secure password generator iOS application focused on usability, data safety, and platform-specific password generation

Website: <https://passcraft.canerates.com>

MobleAR: Real-time Design 3D

AR-based interior design application enabling real-time placements and visualization of USDZ models

Website: <https://moblear.canerates.com>

Chamber Interior Design

AR-based interior design and decision-support application enabling real-time texture and lighting evaluation and object placement

Website: <https://chamberapp.canerates.com>
