

CANER ATES

Senior iOS Developer

Istanbul, Türkiye | cnrates@gmail.com | +90 505 245 1727
[linkedin.com/in/canerates](https://www.linkedin.com/in/canerates) | github.com/canerates | www.canerates.com

SUMMARY

Senior iOS Developer with nine years of software development experience, including five years focused on iOS and four years in web development. Experienced in building and maintaining high-quality iOS applications across diverse domains, with strong foundations in Swift, SwiftUI, UIKit, and modern iOS architectures. Also has hands-on experience with ARKit and RealityKit, delivering advanced features such as LiDAR scanning, real-time 3D rendering, and interactive AR experiences.

EXPERIENCE

iOS Developer

Seenooks, Istanbul, Türkiye

Nov 2024 - Feb 2026

- Sole iOS developer responsible for the design and development of native iOS AR applications
- Designed and maintained the iOS app architecture with a focus on performance, stability, and scalability
- Built AR features using Swift (async/await), ARKit, and RealityKit, including real-time LiDAR scanning and 3D model generation
- Applied MVVM-C and Clean Architecture patterns to support modularity, testability, and long-term maintainability
- Worked closely with a product owner and designer to translate requirements into production-ready features
- Delivered and maintained AR Capture and AR Viewer applications for App Store release

iOS Developer

Freelance

May 2023 - Nov 2024

- Delivered end-to-end development of production iOS applications using Swift, SwiftUI, and UIKit
- Built and shipped AR and utility-focused apps, owning architecture, feature development, and App Store releases
- Developed MobleAR, a real-time AR design application supporting USDZ models, interactive placement, and real-time visualization
- Created PasswOCD, a secure password generator focusing on usability, data safety, and platform-specific password generation

iOS Developer

National Taipei University of Technology, Taipei, Taiwan

Sep 2020 - Apr 2023

- Sole iOS developer responsible for end-to-end design and development of a production-ready augmented reality iOS application
- Built Chamber Interior Design, an AR-based interior design app evolving from academic research into a real-world product
- Implemented real-time AR features using ARKit and RealityKit, including 3D room layout generation, interactive object placement, and dynamic texture and lighting updates

Software Engineer

Power Active Co. Ltd., Taipei, Taiwan

Sep 2019 - Sep 2020

- Developed an iOS prototype application for IP camera and NVR device control, integrating a C++ SDK into a Swift-based iOS application
- Designed and developed a multi-language, role-based e-commerce web platform, owning application architecture, backend services, database management, and UI implementation

Software Engineer

Vestel Electronics R&D Corp., Istanbul, Türkiye

Feb 2014 - Aug 2017

- Developed and maintained a multi-language, multi-branded Smart TV web portal deployed across 80+ countries and 50 brands
- Integrated and maintained web applications optimized for Smart TV environments
- Contributed to internal management and reporting tools supporting the Smart TV platform

SKILLS

iOS Development: Swift, SwiftUI, UIKit, Auto Layout, Combine

Architecture: MVVM, MVVM-C, Clean Architecture, Reactive Programming

Data & Backend: Core Data, CloudKit, Firebase, REST APIs

AR & 3D: ARKit, RealityKit, LiDAR Scanning

Tools: Git, SPM, TestFlight, App Store Connect, Instruments

Web Development: React, Material UI, Styled Components

EDUCATION

M.Sc., Electrical Engineering and Computer Science

National Taipei University of Technology, Taipei, Taiwan

2017 - 2019

B.E., Telecommunications Engineering

Istanbul Technical University, Istanbul, Türkiye

2008 - 2013

PROJECTS

Seenooks AR Capture

Real-time LiDAR scanning iOS application for generating 3D models of real-world objects using ARKit and RealityKit's Object Capture

App Store: <https://apps.apple.com/app/id6743469973>

Seenooks AR Viewer

AR application enabling instant exploration and placement of 3D models, with App Clip support for quick access

App Store: <https://apps.apple.com/app/id6752117131>

MobleAR - Real-time Design 3D

AR-based interior design application enabling real-time placements and visualization of USDZ models

Website: <https://moblear.canerates.com>

PasswOCD - Password Generator

Secure password generator iOS application focused on usability, data safety, and platform-specific password generation

Website: <https://passwocd.canerates.com>

Chamber Interior Design

AR-based interior design and decision-support application enabling real-time texture and lighting evaluation and object placement

Website: <https://chamberapp.canerates.com>
